Professional Summary

Final-year B.Tech. Computer Science student (graduating 2027) seeking the **UI / Frontend Engineer** role. Built responsive, user-friendly interfaces with React, TypeScript, JavaScript, Tailwind CSS, Angular, and SAPUI5, including a live design portfolio and KPI dashboards, and cut task navigation time by 30% through a UX redesign. Strong in problem-solving, debugging, and attention to detail.

Technical Skills

Frontend and UI: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, UI Design, Framer Motion, Angular, SAPUI5, Reusable UI Components, Data Visualization, KPI Dashboards
Languages and Backend: Python, Java, C, C++, SQL, Node.js, Express.js, FastAPI, Flask, REST APIs, MongoDB, MySQL, PostgreSQL, JWT, RBAC
AI / ML: TensorFlow, XGBoost, Prophet, Pandas, Time-Series Forecasting, LLM Integration (Google Gemini API), AI Agents
Tools and Quality: Git, GitHub, VS Code, Vercel, Debugging, Software Testing, Code Reviews
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, MVC, SDLC, Agile

Projects

Developer Portfolio Website *(React, TypeScript, Vite, Tailwind CSS, Framer Motion)* 2026

- Designed and built a responsive, dark-themed developer portfolio with reusable React components and animations, showcasing projects, skills, and certifications; deployed on Vercel.

Inventory Pro – Warehouse Management System *(SAPUI5, SAP Fiori, JavaScript, OData, SAP BTP)* 2025

- Developed a warehouse management app (MVC, OData) with KPI dashboards and Excel export; redesigned navigation with custom UI components, cutting task navigation time by 30%.

ProFlow – SaaS Project Management Platform *(Angular, Node.js, MongoDB, Google Gemini API, JWT)* 2025

- Engineered a full-stack SaaS platform on the MEAN stack (Angular frontend, Node.js backend) with RBAC and JWT authentication to isolate tenant data.
- Integrated Google Gemini API (LLM) to automate task generation and sprint planning, improving team productivity by 55%; debugged REST APIs behind analytics dashboards, increasing task completion rate by 40%.

DisasterLink – Disaster Response Platform *(Next.js, TypeScript, Express.js, PostgreSQL)* 2026

- Built a real-time platform connecting survivors, volunteers, and authorities through SOS alerts, live mapping, and low-bandwidth emergency communication.

SAP Prognos – AI Demand Forecasting Platform *(SAPUI5, FastAPI, Python, XGBoost, Prophet)* 2026

- Built a full-stack platform (final year project) with interactive actual-vs-forecast visualizations and role-based dashboard views in SAPUI5; compared XGBoost and Prophet by MAPE and deployed on Vercel.

Additional Projects *(Python, TensorFlow, Flask, AI Agents, SwiftUI)* 2025–2026

- Deepfake Detection AI (TensorFlow, Flask API); ScammersAreCooked, an AI-agent scam-detection honeypot (India AI Impact Buildathon 2026); iOS Weather and To-Do apps in SwiftUI.

Experience

Hilti Manufacturing India Pvt. Ltd. July 2026 – Present
SAP and Information Technology Intern *Vadodara, India*

- Work in the Production Planning and Control (PPC) team on SAP S/4HANA Cloud at the Vadodara plant, supporting SAP Production Planning (PP) processes and collaborating with business users.

UptoSkills May 2026 – August 2026
Backend Developer Intern *Remote*

- Developed and maintained backend features in a production codebase using Node.js, Express.js, and MongoDB.
- Took ownership of assigned backend modules, fixed defects, and applied code review feedback to maintain code quality.

Education

Parul Institute of Technology – *B.Tech. Computer Science (SAP IEP Track)*	2023 – 2027	CGPA: 6.67/10
Dayanand Science College, Latur – *HSC (Science)*	2021	94.67%
Yashwant International School, Kodoli – *SSC (CBSE)*	2019	75.40%

Certifications

- SAP Certified Associate – Back-End Developer, ABAP Cloud (SAP), July 2025
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Oracle), September 2025
- HackerRank: SQL Basic and Intermediate (Jan 2026); Frontend Developer, React (Aug 2025); Java Basic (2025)
