UI/UX DESIGN • FRONTEND ENGINEERING

ANAND JADHAV

UI/UX DESIGNER • FRONTEND ENGINEER

Designing and engineering responsive, user-friendly enterprise interfaces with React 18, TypeScript, and SAPUI5. Experienced in reducing task navigation friction, translating complex multidimensional data into clear KPI cockpits, and writing clean, component-driven production code.

CURRENT ROLE
Hilti Manufacturing India
SAP S/4HANA Cloud (PPC)

DOCUMENTED UX METRIC
-30% Task Navigation Time
Inventory Pro Redesign

VERIFIED LIVE DEMO
SAP Prognos Platform
sap-forecast.vercel.app

JOURNEY & VALUES

THE DESIGNER WHO UNDERSTANDS CODE

Bridging shopfloor user empathy with modern component-driven frontend architecture.

DESIGN PHILOSOPHY

Enterprise B2B software handles vast arrays of data, but it should never feel punishing to use. I design with **progressive disclosure**—shielding users from cognitive overload by surfacing critical telemetry first, with depth available on demand.

My core strength is serving as an **uncompromising bridge** between design and engineering: translating Figma tokens into production React 18 code with zero visual drift.

> **"Good design in B2B is invisible efficiency."**
> Focused on task duration & error reduction

VISUAL EXPERIENCE TIMELINE

Hilti Manufacturing India
JUL 2026 - PRESENT

SAP and IT Intern • PPC Operations

Support Production Planning & Control on SAP S/4HANA Cloud at Vadodara plant; analyze operational manufacturing workflows directly with business users.

UptoSkills
MAY – AUG 2026

Backend Developer Intern • Remote

Developed and maintained backend features in a production codebase using Node.js, Express.js, and MongoDB.

Parul Institute of Technology
2023 – 2027

B.Tech Computer Science (SAP IEP Track)

Undergraduate degree in CS with enterprise SAP focus; engineered SAP Prognos and Inventory Pro with measurable navigation improvements.

EDUCATION & CERTIFICATIONS

B.Tech Computer Science (SAP Track)
Parul University (2023–2027)

HSC 12th Science: 94.67%
Dayanand Science College, Latur (2021)

SSC 10th CBSE: 75.40%
Yashwant International School (2019)

KEY CERTIFICATIONS

- SAP Certified Associate: ABAP Cloud (2025)
- Oracle Cloud Infrastructure AI Foundations
- HackerRank Frontend Developer (React)

TOOLKIT & CRAFT

CAPABILITY MATRIX & VISUAL DESIGN ARTIFACTS

Structured across user-centered design, reusable UI components, design tokens, and production frontend engineering.

01 // UI DESIGN

FIGMA

Crafting tokenized component libraries, typography scales, 8px layout grids, and accessible color ramps.

- FIGMA COMPONENTS
- SAP FIORI HORIZON
- 8PX GRID SYSTEM
- CONTRAST RATIOS

02 // UX RESEARCH

USER-CENTERED

Analyzing user friction, modeling operational personas, and conducting task flow optimization audits.

- USER INQUIRIES
- PERSONA MODELING
- JOURNEY MAPPING
- HEURISTIC REVIEW

03 // WIREFRAMING & IA

STRUCTURE

Progressive disclosure layouts; restructuring complex multi-tier navigation into intuitive decision views.

- LO-FI WIREFRAMES
- SPATIAL MOCKUPS
- TASK TREES
- PROGRESSIVE DISCLOSURE

04 // MOTION & PROTO

FRAMER MOTION

Implementing natural spring physics, micro-interactions, layout transitions, and feedback loops.

- FRAMER MOTION
- LENIS SMOOTH SCROLL
- MICRO-INTERACTIONS
- SPRING PHYSICS

05 // FRONTEND DEV

REACT 18 • TS

Writing type-safe, reusable component architectures in React 18, TypeScript, Tailwind CSS, and SAPUI5.

- REACT.JS
- TYPESCRIPT
- TAILWIND CSS
- SAPUI5
- NEXT.JS

06 // DATA & APIS

FULL-STACK

Connecting UI controls with RESTful endpoints, Python telemetry backends, and enterprise cloud data.

- FASTAPI
- PYTHON
- REST APIS
- POSTGRESQL
- SAP S/4HANA

VISUAL COMPONENT SYSTEM & DESIGN TOKENS

FIGMA VARIABLES → TAILWIND CONFIG → REACT PROPS

COLOR TOKENS:

TYPOGRAPHY HIERARCHY:

ANTON: Hero & High-Impact Numbers
SPACE GROTESK: Section Titles & Headings
INTER: Accessible UI Labels & Body Copy
JETBRAINS MONO: Telemetry, Code & KPIs

SAMPLE UI ATOMS (REACT/FIGMA):

Run Forecast → · Live S/4HANA Sync · MAPE: 4.8%

SELECTED WORKS

PRODUCTION PLATFORMS WITH MEASURABLE IMPACT

Real-world production platforms built, deployed, and verified with measurable task efficiency improvements.

01 // SAP PROGNOS

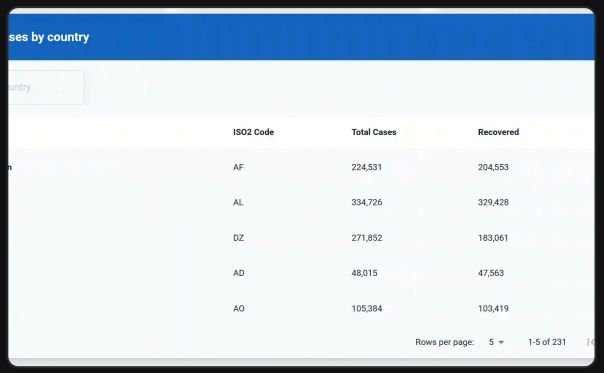

AI FORECASTING

SAPUI5 • FASTAPI • PROPHET • XGBOOST

Built a full-stack predictive platform (final year project) with interactive actual-vs-forecast visualizations and role-based dashboard views in SAPUI5; compared XGBoost and Prophet by MAPE.

Dual Model Comparison

sap-forecast.vercel.app

02 // INVENTORY PRO

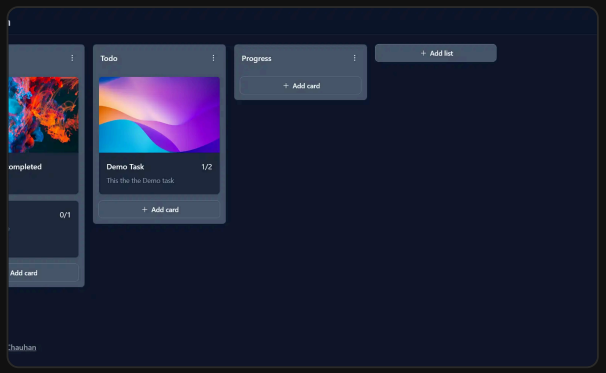

WAREHOUSE SAP

SAPUI5 • SAP FIORI • ODATA • SAP BTP

Developed a warehouse management app (MVC, OData) with KPI dashboards and Excel export; redesigned navigation with custom UI components, cutting task navigation time by 30%.

30% Nav Time Cut

SAP BTP Deployed

03 // PROFLOW SAAS

SAAS • AI

ANGULAR • NODE.JS • MONGODB • GEMINI API

Engineered a full-stack SaaS platform on the MEAN stack with RBAC and JWT auth. Integrated Google Gemini API to automate task generation and sprint planning, improving team productivity by 55% and task completion by 40%.

+55% Team Velocity

JWT Multitenant

DEEP DIVE CASE STUDY

SAP PROGNOS: PREDICTIVE FORECASTING COCKPIT

Transforming fragmented manufacturing spreadsheets into an interactive actual-vs-forecast comparison dashboard.

01 Problem Context

Enterprise planners previously handled demand forecasting across disconnected Excel spreadsheets and terminal scripts, lacking unified side-by-side trend visibility.

02 Persona: Vikram Sharma (38)

Lead Inventory Planner: Needs transparent model validation between Prophet and XGBoost without having to write code or debug statistical scripts in terminal.

03 Visual User Journey Flow

STEP 1 Ingest CSV → STEP 2 Run Models → STEP 3 MAPE Curves → STEP 4 Role Cockpit

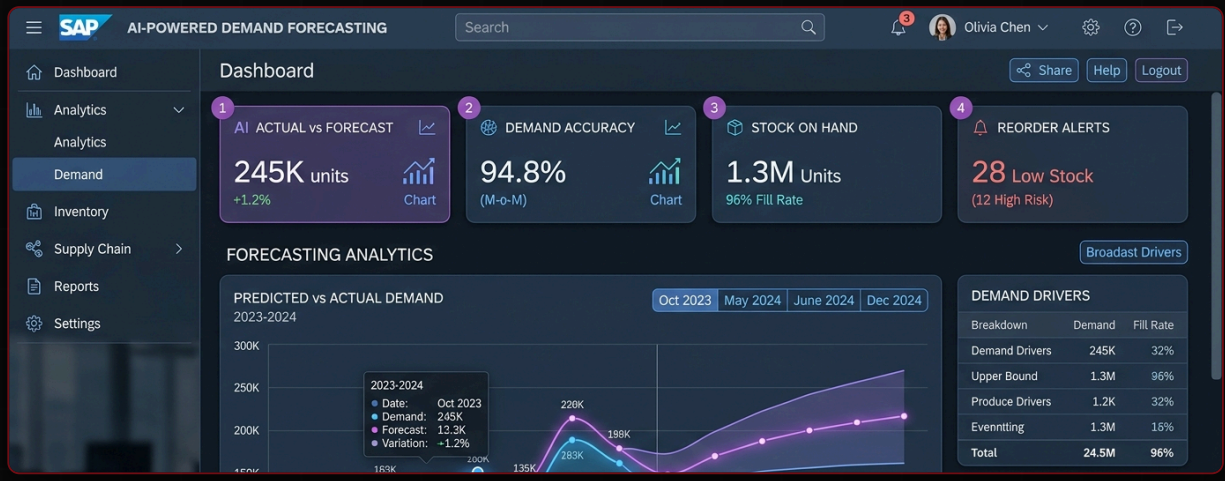

KEY DESIGN DECISIONS & RATIONALE

1. Model Comparison Layout: Implemented a side-by-side time-series chart allowing planners to visually cross-check Prophet and XGBoost forecast trajectories against actual sales.

2. Progressive Disclosure: Separated high-level MAPE accuracy indicators from granular parameter tuners, keeping the main interface focused on operational action.

3. Role-Based Views: Designed dedicated dashboard perspectives in SAPUI5 for production planners vs. inventory management.

• LIVE COCKPIT DEMO: sap-forecast.vercel.app

METHODOLOGY

THE 6-STAGE HUMAN-CENTERED DESIGN WORKFLOW

How I transform ambiguous enterprise requirements into accessible, high-performance production components.

01
DISCOVER
User shadowing, workflow analysis, pain point identification.
PROBLEM CANVAS

02
DEFINE
User persona formulation, empathy mapping, workflow mapping.
USER PERSONAS

03
IDEATE
Information architecture, progressive disclosure trees, task flows.
IA MAPS

04
WIREFRAME
Low-fi sketches to validate spatial hierarchy before coding.
LO-FI DECKS

05
DESIGN
Figma component libraries, 8px grid, accessible color contrast.
DESIGN TOKENS

06
VALIDATE
Interactive React component testing, code review, user feedback.
USABILITY REVIEW

1. ZERO DESIGN DRIFT

Maintaining 1:1 parity between Figma variables and Tailwind CSS custom properties, ensuring visual integrity during frontend sprint implementation.

2. ACCESSIBILITY-FIRST

Ensuring high-contrast dark mode readability, visible keyboard focus rings, and touch-safe minimum 44px tap targets across all viewports.

3. MEASURABLE EFFICIENCY

Design success is evaluated through reduced operational task duration, lower cognitive error rates, and clean navigation ergonomics.

ENGINEERING EXECUTION

TRANSLATING FIGMA DESIGNS INTO REACT 18 CODE

How component-driven engineering, synchronized design tokens, and smooth motion deliver responsive interfaces.

01. Atomic Components

Structuring interfaces into Atoms (Buttons, Badges), Molecules (KPI Cards), and Organisms (Forecast Cockpit) with strict TypeScript prop contracts.

REACT 18 • TYPESCRIPT

02. Tokenized CSS

Figma color tokens map directly to Tailwind CSS variables (`--bg`, `--red`, `--line`), maintaining strict 8px layout rhythm.

TAILWIND CSS TOKENS

03. Responsive Design

Designing for responsive viewports (360px mobile to 1440px desktop) with flexible fluid typography and overflow protection.

FLUID VIEWPORTS

04. Smooth Motion

Hardware-accelerated transforms with Apple Expo Out easing. Touch devices gracefully disable tilt effects to respect battery life.

FRAMER MOTION

// PRODUCTION TYPE-SAFE MOTION INTERFACE — src/lib/motion.ts

```ts
// Apple Expo Out Easing Curve
export const ease = [0.22, 1, 0.36, 1] as const;

export const fadeUp = {
  hidden: { opacity: 0, y: 24, filter: 'blur(6px)' },
  show: {
    opacity: 1,
    y: 0,
    filter: 'blur(0px)',
    transition: { duration: 0.8, ease }
  },
};

export const springTransition = {
  type: 'spring',
  stiffness: 350,
  damping: 25,
};
```

Ensures smooth transitions without layout shifts.

EXPLORATION & SYSTEMS

ADDITIONAL SYSTEMS, INTERFACES & PROTOTYPES

Real-time emergency response platform, kinematic robotics simulator, and interactive micro-interaction lab.

GEOSPATIAL SOS PLATFORM — LIVE ALERTS

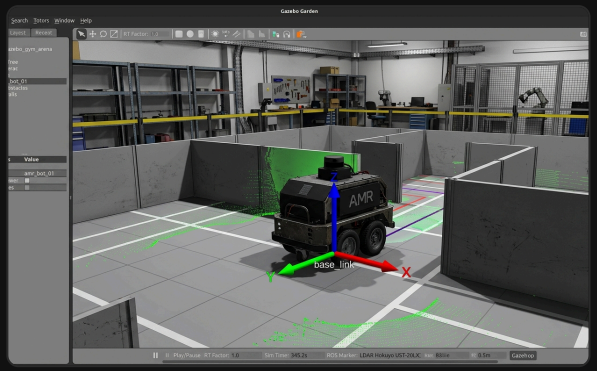

DisasterLink
Low-Bandwidth Crisis Response

NEXT.JS · POSTGRESQL

DISASTERLINK PLATFORM

Real-time platform connecting survivors, volunteers, and emergency authorities through SOS alerts, live geospatial mapping, and low-bandwidth communication protocols.

TYPESCRIPT • NEXT.JS

ROBOTICS TELEMETRY SIMULATOR

Tactical hardware simulation cockpit displaying real-time kinematic motor angles, battery drain telemetry, and camera diagnostics for physical prototypes.

HARDWARE HMI COCKPIT

PROTOTYPE UI LAB — INTERACTION

Contextual Cursor & Slider
Prototyped for Anand's Portfolio

Framer Motion • Lenis Smooth Scroll

INTERACTION LAB

Designed agency-grade micro-interactions: contextual follower cursor (VIEW, DRAG), draggable before/after transformation slider, and scroll progress lines.

PROTOTYPE & LAB

CONNECTION & VERIFICATION

LET'S BUILD EXCEPTIONAL ENTERPRISE UI

Prepared for the Demandbase Campus Interview • Parul University Placement Drive 2026/2027.

STATEMENT OF INTEREST FOR DEMANDBASE

"Modern B2B marketing and sales intelligence platforms succeed based on how effortlessly users can extract insight from overwhelming data volumes. My background—unifying human-centered research, enterprise design systems like SAP Fiori, and production-grade React 18 / TypeScript code—directly aligns with Demandbase's vision of delivering best-in-class UI/UX. I am eager to contribute immediately to your frontend engineering team."

— **Anand Jadhav**, Candidate for UI / Frontend Engineer
