01. HUMAN-CENTERED UI/UX METHODOLOGY (DOUBLE DIAMOND)

1. DISCOVER	2. DEFINE	3. DEVELOP	4. DELIVER
Contextual user interviews, field shadowing, friction mapping.	Persona modeling, journey mapping, task hierarchy tree.	Lo-fi wireframing, SAP Fiori Horizon design tokens, atomic UI.	Interactive prototyping, usability testing, SUS benchmarking.

02. FLAGSHIP CASE STUDY: SAP PROGNOS (AI DEMAND FORECASTING)

SAP Prognos: Enterprise Demand Forecasting & Analytics Cockpit

Role: Lead UX/UI & Frontend Developer | Tools: Figma, SAPUI5, FastAPI, Prophet, XGBoost

[+] Problem Statement:

Plant supply chain planners managed forecasting across 4 disparate Excel spreadsheets and Python scripts. Lack of real-time actual-vs-forecast comparison caused 18% inventory discrepancies and 47-minute weekly planning bottlenecks.

[+] User Research & Personas:

Shadowed 4 production planners at plant level. Formulated primary persona 'Vikram (38), Lead Inventory Planner', who needed transparent model validation without requiring raw mathematical or code debugging skills.

[+] Information Architecture & Wireframes:

Engineered a 3-stage progressive disclosure architecture (Ingest Data -> Validate MAPE Curves -> 1-Click SAP ERP Sync). Replaced 14 raw parameters with 3 adaptive presets, reducing cognitive load.

[+] UI Design System & Accessibility:

Built an enterprise design system adhering strictly to SAP Fiori 3.0 Horizon. Enforced 4.5:1 WCAG 2.1 AA contrast standards, calibrated 8px layout grid, and applied deep charcoal backgrounds with signature crimson alerts.

[+] Measured Business & UX Impact:

Conducted standardized System Usability Scale (SUS) benchmark testing with 6 participants: SUS r

KEY VALIDATION METRICS: **34% FASTER WORKFLOW | SUS 88/100 (GRADE A) | 97.9% ACCURACY** [LIVE DEMO ->]

03. BEFORE VS AFTER INTERFACE TRANSFORMATION

BEFORE: Legacy Excel & Isolated Scripts

- 47 minutes average weekly planning duration
- Cluttered rows with unvalidated manual formula errors
- Zero visual confidence bands or forecast curves

System Usability Scale: 42 / 100 (Failing)

AFTER: Redesigned SAP Fiori Horizon Cockpit

- 31 minutes planning duration (34% time savings)
- Progressive disclosure: 14 parameters in 3 presets
- Real-time interactive Prophet vs XGBoost MAPE curves

System Usability Scale: 88 / 100 (Grade A Excellence)

04. CORE UI/UX & ENGINEERING COMPETENCIES

UX RESEARCH & STRATEGY:	User Interviews, Persona Modeling, Journey Mapping, Usability Testing (SUS), Heuristic Evaluation, Information Architecture, Double Diamond Methodology.
UI & VISUAL CRAFT:	Figma Design Systems, SAP Fiori 3.0 Horizon, Design Tokens, Atomic Component Libraries, Responsive 8px Grid, WCAG 2.1 AA Accessibility, High-Fidelity Prototyping.
FRONTEND & SAP TECH:	React.js, Next.js, TypeScript, SAPUI5, Tailwind CSS, Framer Motion, Angular, REST APIs, FastAPI, Python, Node.js, Git & GitHub CI/CD, SAP S/4HANA Cloud (PP/PPC).

05. ADDITIONAL PRODUCTION CASE STUDIES

Case Study 02: Inventory Pro - Warehouse Management System (SAP BTP & Fiori)

Stack: SAPUI5, SAP Fiori Horizon, OData, SAP BTP, JavaScript | Role: UI/UX & Frontend Lead

- Problem: Warehouse managers experienced high cognitive fatigue scanning dense tabular data across picking lists.
- UX Redesign: Rebuilt navigation tree with custom visual KPI cards and contextual search filters.
- Outcome: Cut task navigation duration by 30% and eliminated picking reconciliation bottlenecks.

VALIDATION: 30% REDUCTION IN NAVIGATION TIME | SEAMLESS ODATA V2 INTEGRATION

Case Study 03: ProFlow - SaaS Project Management Platform (Angular + Gemini AI)

Stack: Angular, Node.js, MongoDB, Google Gemini API, JWT Auth | Role: Full-Stack & UI Engineer

- Problem: Cross-functional software squads suffered from delayed sprint estimations and fragmented user stories.
- UX Redesign: Designed an AI-assisted sprint planning canvas with drag-and-drop Kanbans and clear RBAC hierarchy.
- Outcome: Accelerated sprint setup from 2.5 hours to 15 minutes, boosting squad velocity by 55%.

VALIDATION: 55% SPRINT PLANNING TIME IMPROVEMENT | ROLE-BASED ACCESS CONTROL

06. INDUSTRIAL EXPERIENCE & ENTERPRISE ROLES

Hilti Manufacturing India Pvt. Ltd. | SAP and Information Technology Intern *July 2026 - Present | Vadodara Plant*

- Stationed on-site in the Production Planning and Control (PPC) team supporting SAP S/4HANA Cloud operations.
- Analyze industrial shopfloor workflows, collaborate directly with business users, and bridge UI requirements with ERP systems.

UptoSkills | Backend Developer Intern *May 2026 - August 2026 | Remote*

- Engineered robust RESTful endpoints with Node.js and Express; optimized MongoDB query execution by 28%.
- Partnered with frontend designers to enforce schema contracts and ensure zero data mismatch during sprint releases.

07. ACADEMIC CREDENTIALS & EDUCATION

Parul Institute of Technology, Parul University - B.Tech Computer Science & Engineering **CGPA: 8.71 / 10 | 2023 - 2027**
Specialization: SAP Industry Enabled Program (IEP) | Enrollment: 2303031570026

Maharashtra State Board (HSC) - 12th Science **Score: 94.00% | 2021 - 2023**

READY FOR UI/UX & FULL-STACK ENGINEERING INTERVIEWS

Available immediately for full-time frontend, UI/UX, and SAP software engineering roles.
